

**IN THE CLAIMS**

Please amend the claims as follows in accordance with the Revised Format of Amendments under 37 C.F.R. § 1.121.

Claims 1-5 (cancelled).

6. (original) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module; and
- (b) forming an image from a plurality of printed sheets with the lamination module.

Claims 7-20 (cancelled)

21.(new) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module;
- (b) forming an image from a plurality of printed sheets with the lamination module; and
- (c) generating imaging instructions with the lamination module.

22.(new) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module;
- (b) forming an image from a plurality of printed sheets with the lamination module; and
- (c) forming an enlarged image with the lamination module from the plurality of printed sheets.

23.(new) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module;

- (b) forming an image from a plurality of printed sheets with the lamination module;
- (c) executing a lamination finishing sequence with the lamination module; and
- (d) determining from the print job command whether a desired image is larger than allowable standard settings for the printing system.

24.(new) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module;
- (b) forming an image from a plurality of printed sheets with the lamination module;
- (c) executing a lamination finishing sequence with the lamination module; and
- (d) determining user preferences associated with the print job command and generating imaging instructions with the lamination module based on the user preferences.

25.(new) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module;
- (b) forming an image from a plurality of printed sheets with the lamination module;
- (c) executing a lamination finishing sequence with the lamination module;
- (d) determining user preferences associated with the print job command and generating imaging instructions with the lamination module based on the user preferences; and
- (e) printing based on imaging instructions.

26.(new) A method for image formation through lamination,  
comprising the steps of:

- (a) connecting a printing system with a lamination module;
- (b) forming an image from a plurality of printed sheets with the lamination module;
- (c) executing a lamination finishing sequence with the lamination module;
- (d) determining user preferences associated with the print job command and generating imaging instructions with the lamination module based on the user preferences; and
- (e) laminating based on the imaging instructions.
